A Complete Hospital Management Information System

[www.hospycare.com](http://www.hospycare.com)

## MICROPRO'S HOSPYCARE HMIS

Micropro's HospyCare HMIS is a nextGen Java based Application developed with relentless efforts of dedicated personnel. Hospycare allows healthcare businesses or organizations to unlock the power of all their information sitting in clinical, financial, and administrative data banks. HospyCare offers healthcare organizations an innovative way to capture, consolidate, store, access, and quickly present information. HospyCare is a state-of-the-art, integrated hospital information system designed to meet the needs of developed and vivid markets.

## WHY MICROPRO?

30+ Years of experience in architecting technical solution and services.

An ISO 9001:2015 & ISO 27001:2013 certified and appraised for CMMI Level 3 company.

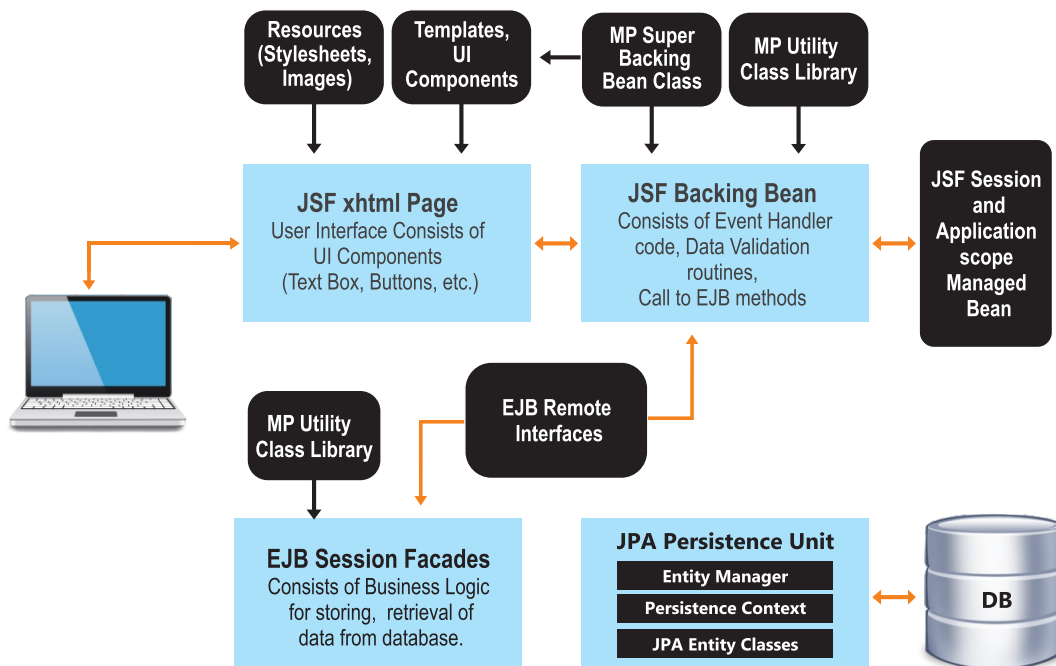

Major presence in Central India, Middle East and Southeastern Africa.

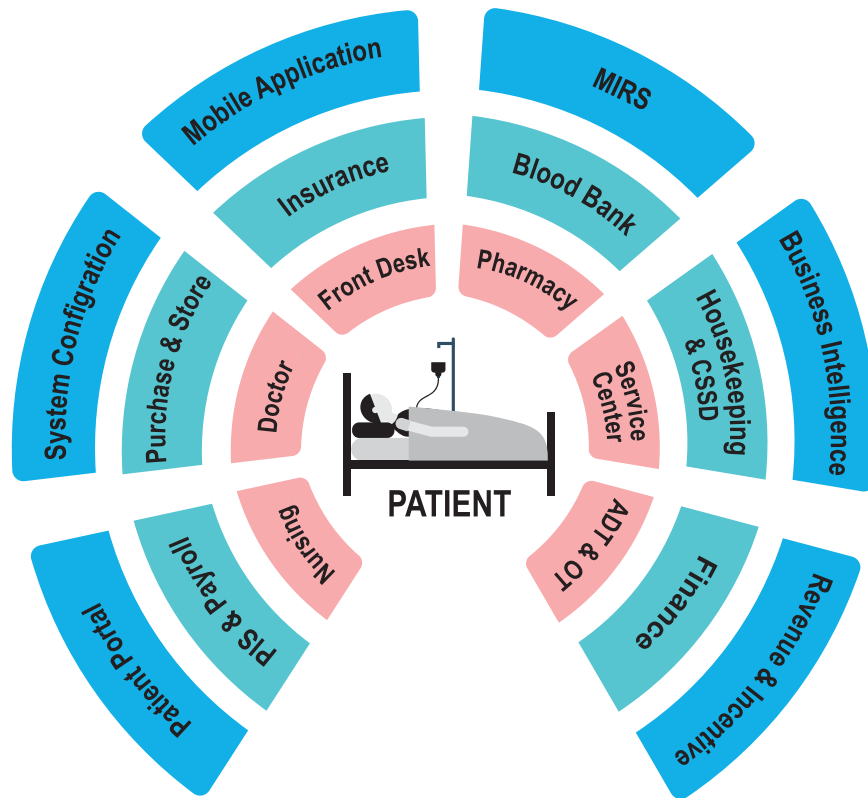

Multiple Domain Expertise in the field of Healthcare, Accounting & Finance, Academics, Automobile, Textile, Modular Furniture, Dairy Industry and customized software solutions.

Experts in providing large Turnkey IT solutions.

## TECHNICAL EXPERTISE

Built on JAVA Server Faces having 3-Tier MVC architecture, deployed on open source glassfish application server, compatible with Open Source Database system, work on Heterogeneous Operating System and an interactive Android Application developed specifically for easiness of Doctors.

### SALIENT FEATURES

- End to End MIS Solution for any size Healthcare Organizations.
- Clear visibility to management for policy decisions & effective ROI on their investment.
- Helps to plan Effective & Qualitative utilization of healthcare facilities.
- Enhances patient appreciation on overall healthcare experience achieved through automation & Improved Patient Care due to the availability of Patient data across all facilities.
- Allows Doctors / Nurses to maintain patient EMR data for future references. Also, systems capability allows the doctor to reproduce available system data as per management access policy.
- It helps as a decision support system for the hospital authorities for facilitating comprehensive health care facility promotion & policies.
- Flexible Materials Management minimizes dead investments, losses & gives birds eye view analysis of usage & helps to optimize the appropriate level of stocks.
- Enhances information integrity by a reduction in transcription errors and duplication of information entries.
- Workflow based automation eliminates inaccurate calculation by users input.
- Easy to work on analytical reporting through excel downloadable reports or through integration of 3rd Party BI (Business Intelligence) Tool.

- The system is adaptable to various communication Channel for doctors, patient & stakeholder with configuration.
- Web-Based Single Server based deployment helps the organization to reduce Investments, maintenance & save complexity of consolidation.
- Tightly Integrated RCM Cycle for Insurance & Corporate Patients associated with finance module.
- General and Standardized Health Packages for the OPD and IPD Patients.
- Data security, integrity, and accessibility & authentication and verification of entries through Audit Trail.
- Comprehensive Performance / Statistical Reports with Graphical representation for Top Management.
- Effective integration with Laboratory Information System, Picture Archiving Communication System, Attendance Biometric Machine, National ID Card Reader and various Medical IOT Devices.

### IT Infrastructure Management Services Offered

- 1) Remote Monitoring and Management Services for application and underlying IT infrastructures.
- 2) Capacity planning & management services for application & IT resources. (Server, Storage, Database)
- 3) Enterprise Backup, Recovery and Archival Management Services.
- 4) Database & Application performance tuning and monitoring.

## ACCREDITATIONS

## CLIENT'S TESTIMONIAL

"We cannot overstate the value of the Hospycare software. It is a wonderfully simple, yet very powerful HMIS software to integrate our hospital functions that has helped us to progress this far in Middle East. Using Hospycare since 2002 is a major contributor to make our hospital look much more efficient when compared to what I had when we started ....."

**-Taher Shams**

President Zulekha Hospital, Dubai

"The main object of total computerization system was to bring co-ordination among all the wards and reduce the discharge timing. With the implementation of HOSPYCARE, we have succeeded in our aim. Working closely with Micropro's Team to develop a unique Drug Prescription Automation have faster our OPD flow and have reduced human error."

**-Dr. Mohib Haque**

Medical Director & Owner, Oasis Nursing Center, Nagpur, India

"My initial experience with Micropro was quite interesting as we had a stimulating session to understand their novel concept of an enterprise solution to address problems of networked hospitals and clinics. My entire journey with Micropro had been thoroughly enriching experience with their impeccable understanding of the Healthcare domain, immaculate documentation, and estimable implementation methodology. I am highly impressed by their strong technology command when we had to integrate HIS & LIS under the HL7 framework."

**-Dr Abdul Gafoor**

Chairman, IbinSina Medical Group and Amina Hospital, Ajman. UAE

"Micropro's consulting approach and enterprise HIS solutions have enabled us to use IT as a strategic tool rather than just an operational system. This system also ensures that all sites comply with central policies and also manage quality at the desired level. Our facilities have reduced insurance rejection from 22% to 6% making the RCM Cycle efficient and easy to use."

**-Dr. Sanjay Paithankar**

Chairman & Managing Director, Right Health Group, UAE

"We took wise decision in going for HOSPYCARE HMIS solution, we got benefits in less than 6 months of inception in our hospital in terms of Patient History, Insurance clearance and has drastically reduced our inventory also all the module are so tightly integrated that there is hardly now any double entry in the system which has saved a lot of time of our manpower."

**-Dr. Mustafa Kutianwala**

Director, Central Private Hospital LLH, Sharjah
