

Job Description - Java Developer

Micropro Software Solution Limited is actively looking for skilled Java Developers with hands-on experience in Core/Advanced Java and J2EE technologies. The role involves developing enterprise-level applications, creating UI components, optimizing database queries, and contributing to all phases of the software development lifecycle.

Experience - 3 to 5 Years

Location - Nagpur

Key Responsibilities

1. Develop and maintain Java-based applications.
2. Work with J2EE technologies, EJB, and Hibernate.
3. Should have strong experience with My SQL .
4. Build dynamic UI components using jQuery, HTML, CSS, and JavaScript.
5. Participate in requirement analysis, design discussions, and code reviews.
6. Debug issues and provide technical support.

Required Skills

1. Strong knowledge of Core Java, Advanced Java, J2EE, EJB, and Hibernate.
2. Proficient in SQL and relational databases (Oracle preferred).
3. Front-end skills: jQuery, HTML5, CSS3, JavaScript.
4. Good communication and problem-solving abilities.

Preferred Skills

1. Experience with Tomcat or Glassfish.
2. Knowledge of REST/SOAP web services.
3. Familiarity with Spring Boot.
